

Maruf Erkinov

Full-Stack Developer | React | Next.js | Node.js

Tashkent, Uzbekistan | +998 91 246 65 53 | maroofarkinov@gmail.com
github.com/Maruf-dev | itsmaroof.uz

Profile

Full-stack developer focused on building modern web applications with **React, Next.js, TypeScript, and Node.js**. Hands-on experience with REST APIs, backend business logic, integrations, databases, debugging, and production-oriented application workflows. Comfortable working across frontend and backend boundaries, with **Python** as an additional backend language. Strong foundation in PostgreSQL, Docker, Git, API testing, validation, and maintainable software delivery.

Technical Skills

Frontend	React, Next.js, TypeScript, JavaScript, HTML5, CSS3, responsive UI, component-based development
Backend	Node.js, REST APIs, authentication, business logic, API integrations, Python
Data	PostgreSQL, SQL, PostGIS, Redis, data processing
Tools	Git, GitHub, Docker, Linux, Postman, Swagger, Vite, debugging, logging
Practices	Validation, testing, error handling, modular design, documentation, API design

Professional Experience

Teamit	Jun 2025 – Present
Python / Backend Engineer	Tashkent / Remote
- Develop backend modules, REST APIs, business logic, data flows, and external-service integrations for production applications. - Translate product requirements into implementable engineering tasks and deliver features through integration, testing, debugging, and verification. - Improve application reliability through validation, error handling, logging, troubleshooting, and maintainable service design. - Work with databases, API behavior, application integrations, and cross-functional stakeholders during feature delivery.	
EPAM	Jan 2025 – May 2025
Software Engineering Intern	Remote
- Developed software components involving APIs, databases, data-processing workflows, and backend integrations. - Diagnosed technical issues across application components and collaborated with team members on feature delivery and improvements.	

Selected Projects

Content Management System (CMS)	Nov 2023
React, JavaScript, REST API integration	Personal / Project Work
- Built authentication flows including registration, login, protected routes, and client-side token handling. - Connected frontend workflows to backend data and implemented application logic for user-driven functionality.	
Personal Full-Stack / Backend Application	
Python, REST APIs, PostgreSQL, Redis, Docker	Project Work
- Built an end-to-end application with REST APIs, database-backed workflows, asynchronous tasks, validation, logging, retries, and containerized deployment. - Structured backend components for maintainability and reliable integration with client-facing application flows.	

Education

Kazan Federal University (KFU)	2024
Bachelor's Degree in Software Engineering	Jizzakh, Uzbekistan
